PRODUCT CATALOGUE 2016

zioxl

Furniture to support & inspire learning

Welcome to the zioxi catalogue

If you want learning spaces that work as hard as you do then you are in the right place.

zioxi designs and manufactures furniture to support and inspire learning. We enjoy solving problems through design with inspiring products integrated into practical and stunning room layouts.

We believe that classrooms should be places where students want to learn and we are lucky enough to work with some amazing teachers to create wonderful environments for their students. Take a look at our **Case Studies** on pages 140-155.

There are some great new products in this years catalogue to reflect developments in technology and ways of working. The **zioxi Collaborative Table** on pages 24-25 is perfect to connect and share in collaborative group. We have some new and different shapes for **Classroom Tables** on pages 74 and 75 and check out page 49 for a **Charging Locker** with a difference!

Some old favourites also get a makeover and our ever popular **Mobile Device Trolleys** are sporting a number of improvements on pages 34-42. Read, enjoy and if you want any advice or help to transform your learning spaces, call us on **01844 280123** or visit **www.zioxi.co.uk**. We would love to hear from you.

Contents

Products

14 t41 Family
The original and best agile classroom table that puts you in control of your classroom layout.

34 Mobile Device Charging & Storage
Safe, secure and ready when you are, charging and storage solutions for mobile devices.

70 Tables
Round, square, wedge-shaped, rectangular, trapezoid and one in the shape of an apple. And you thought you knew tables...

22 Integrated ICT
From desk to ICT workstation at the touch of a button. For ICT as and when you want it.

56 Storage
A place for everything and everything in its place; products to organise your stuff and your space.

86 Seating
Whether it's height-adjustable, mobile, stackable, wooden or upholstered, there's a seat here for you – even if you are the teacher.

118 Space Dividers
We know that spaces need to change so we have put together a range of novel space dividers.

128 Swatches
To give you an idea of colours and finishes.

140 Case Studies
The proof of the pudding. This is what it looks like in the real world. Real life case studies from seven recent projects.

124 Fixed Furniture
Built in access to everything - including the kitchen sink.

134 The zioxi Touch
Learn more about what we do and how we do it.

156 How to order
All the information you need – contact details, information about delivery and installation.

About zioxi

We do it all... from design to install.

We have teams of dedicated, talented people, passionate about their work to design, build, plan, manufacture, deliver and install furniture that supports and inspires learning.

It's not your job to know how to put learning spaces together – it's ours, and we take great pride in supporting our customers from start to finish. We are highly involved at every stage of the process – helping make good decisions, giving accurate plans and costs, checking we've got the order right, delivering when we say we will, installing it and making sure everything has gone to plan.

"zioxi furniture met our need for agility and flexibility and enabled us to make our vision a reality."

Jane Loomes, Head Teacher.
Jesmond Gardens Primary School

"The organisation, communication and customer care were second to none"

Leigh Wolmarans, Head Teacher.
Lings Primary School

"It was a pleasure working with the team at zioxi on the design of our new classrooms"

Mark Rapps, Head Teacher.
Earl Spencer Primary School

Learning Resource Centres

Modern Libraries and Learning Spaces

The recent move towards the use of mobile devices means that learning resource centres now need to be more multifunctional than before. Not only do they need to provide functional storage for books but also lots of different areas that encourage group work or one to one research with mobile devices.

The Showcase Classroom

Inspiring, creative & Interactive

The showcase classroom is an inspiring, creative and interactive learning environment. It's important to include lots of different areas to encourage different styles of learning and support the use of a wide range of ICT. Colourful glass panels and flexible furniture encourage spontaneous creative thinking and group brainstorming.

Mobile ICT Suite

ICT whenever you need it

Gone are the days of the fixed ICT suite. With the flexibility and performance of laptops, ICT suites can now double as an ordinary classroom with the IT available and charged whenever you need it for a lesson. Mobile desks cater for different classroom layouts, with a powerHub available to top up the charge when you need it.

Creative Classrooms

Spark your imagination

Studies show that desks set up in rows increase feelings of isolation, whereas varied learning spaces increase creativity and collaboration. Mix shapes and colours with a range of different seating to encourage your students to learn where they feel most inspired.

t41 Family

The original and best agile student table. In rows, waves, clusters or circles you can have any layout you like. Or flip the top up and nest them together to clear a space – you're in control.

t41 Individual Student Table 60°

For agile and adaptable learning spaces

In rows, waves, collaborative groups, clustered round a mobile power and/or data hub for ICT or stacked horizontally to clear a space, t41 responds to the unique demands of each lesson.

60° version allows six t41s to cluster in a circle around an **zioxi** Wireless powerHub (see page 52).

For classrooms, breakout spaces and libraries.

Height adjustable t41 – easy to wind up!

Finishes		
Mild steel frame, epoxy-coated to RAL9006 (silver). Worksurface compact laminate. Available in 6 different heights.

Integrated ICT and Projection

Spaghetti cabling, too far from the plug socket, takes ages to set up... It doesn't have to be like this. With the right furniture, cable management and power solutions it can all work beautifully.

zioxi Collaborative Tables

Multimedia team work tables

With a shared display screen as its centrepiece the **zioxi** collaborative table enables groups of people to share screens as they work so they don't have to huddle around one laptop. Comes in a range of shapes and sizes to accommodate from five to nine people, available in a variety of colours with integrated power and data options. Screen connectivity options include single or switched AV through to solutions like Extron Teamwork or wireless Creston AirMedia.

For open-plan learning zones, ICT suites, libraries, meeting rooms and conference facilities.

✂ (see p159)

Finishes		Colours
Epoxy-coated frame RAL9010 (white). Worksurface compact laminate as standard.

zioxi Laptop and Tablet Charging Lockers

Multi-user, compact charging lockers

Each locker is accessed via an individual code lock (with a code chosen by the user) or a key. These compact locker modules are designed to sit on work surfaces and within shelving but can also be stacked.

1:1 charging locker has a separate compartment for plugging in and storing power adapters, users simply connect their device.

BYOD charging locker provides mains power sockets in each compartment so users bring their own charging cable and adapter.

For classrooms, libraries, ICT areas and any space where multi-user charging facilities are required.

1:1 iPad charging locker

zioxi Charging Locker Banks

Floor standing mobile device charging banks

Create banks of mobile device charging lockers with these 16 and 20 bay floorstanding units designed to charge mobile devices with screen sizes of up to 12 inches. A separate electrical compartment houses AC adapters with only charging cables accessible in the lockers – kept short to keep things tidy. Lockers are opened with a digital code or key, giving the option to dedicate lockers to individuals or enable multi user operation – like a hotel safe.

For libraries, ICT areas, open areas – in fact any space where multi-user charging facilities are required.

Finishes

Refectory Tables

Bold, contemporary style for maximum capacity

Hard wearing, easy to clean and looks really cool. Just the thing to liven up your dining areas and encourage students to eat together – and the lack of defined seating numbers means additional capacity if they shuffle up a bit. Or take dining to a new level with poseur height tables.

For dining areas, refectories, canteens and cafeterias.

Fixed Furniture

We recognise that some teaching spaces are solely for one subject. Our customised fixed furniture meets your needs and may even include a kitchen sink...

Fixed Furniture

Built-in access to everything – including the kitchen sink

Superior build quality and bespoke **zioxi** design mean our fixed benching can accommodate anything: sinks, storage, traysets, power, data, gas, cooker hobs – anything you need. Full site survey required as your benching will be designed especially for you.

For science labs, DT rooms, art, food technology and all practical subject areas.

✂ (see p159)

Standard Finishes
MFMDf carcass with compact laminate worksurface (optional acid resistance).

All orders are bespoke to your space and subject to a full site survey.
Please contact us to book your free consultation and quotation.

Colours
Various options available depending on material specification.

The zioxi touch

*So, why do people choose zioxi?
What makes us different?*

It all comes down to our people.

We have teams of dedicated, talented people, passionate about their work to design, build, plan, manufacture, deliver and install furniture that supports and inspires learning.

It's not your job to know how to put learning spaces together – it's ours, and we take great pride in supporting our customers from start to finish. We are highly involved at every stage of the process – helping make good decisions, giving accurate plans and costs, checking we've got the order right, delivering when we say we will, installing it and making sure everything has gone to plan.

Only when we see a completed installation and we've cleared away the packaging to leave a shiny new learning space (or a much enhanced old one) and a happy customer do we consider it 'job done'.

It's the **zioxi** touch. And here you can learn more about what we do and how we do it.

01 CONSULT

Every school is unique and has its own educational vision. The first step for us is to listen, so we understand what you are trying to achieve. Then we show you different ways of making it happen. And we don't just specify our own designs. If we know another manufacturer has the perfect product and it meets our quality criteria, we'll suggest it.

02 DESIGN

We're problem solvers at heart. We constantly question the status quo, wonder why things are the way they are and ask if there is a better way.

Wouldn't it be great if you could move stuff around and create clear space? Then one room could perform many roles. Could an English classroom turn into a drama studio, or the hall could become an open plan learning zone? Surely, if classroom chairs were more comfortable, students would concentrate better? Wouldn't it be great if you could dip into ICT as and when you felt like it? These are the scenarios our design team seek to make real.

03 PLAN

Measure it, measure it again, go away, have a cup of tea and then go back and measure it again... Or ask us to do it for you. Whether it's a single classroom or an entire school, you need to be sure it fits, that you can get power to where you need it, and that it allows enough space for moving around. Our space planners provide detailed layouts so you can see how it's going to work.

04 TEST

As well as consulting teachers and learners, we talk to a broad range of industry experts, from designers and manufacturers to ergonomists. This keeps us informed about all the latest developments in materials, manufacturing techniques and design.

05 MANUFACTURE

Build quality is paramount. We use materials and manufacturing processes that ensure our furniture can withstand the inevitable knocks and scuffs of school life, while retaining its good looks. Welding, rather than crush-bending, is robust and looks better. Alloy inserts make joins ultra-strong and means the screws will stay put. Compact laminate, which most of our table tops are made of, is one solid piece so the edges won't peel off your tables. It's this attention to detail that makes all the difference.

06 SCHEDULE

When do you want it delivered? And where is it going? Is there a lift? And can we just check that you definitely want this colour, on glides, not castors? We want your order, your delivery and your installation to be right first time. That's where our sales support and scheduling teams come in. They will calmly guide you through the process (and make sure you don't order Reception-size chairs for enormous Year 11s). They will also find out about your school and its location to work out the best way to deliver and the best time to install your furniture.

07 ASSEMBLY

Our furniture doesn't simply roll off the end of a machine. It's a fundamental part of **ziox**i quality that our unique designs are assembled by our highly skilled production team. We use quality components and materials which, when combined with the care and attention of our assembly team, create a product that is a cut above in terms of quality.

09 DELIVERY

As a group we have stringent targets to reduce our emissions and mileage as well as our paper consumption. We segregate all our manufacturing waste for recycling and we comply with the WEEE directive, battery directive, RoHS and Packaging Waste regulations and directives.

08 LOGISTICS

Our logistics teams are the people who round up the right products and package them ready for transportation to arrive at the right place at the right time. No mean feat when you work with schools and colleges the length and breadth of the country.

10 INSTALLATION

Our installation team are all fully trained **zioxi** employees. We don't rely on third parties to deliver our furniture (unless it's a single item and you'll know exactly what to do with it) and we don't just leave it in reception for your caretaker to deal with. We unload, unpack, install, make sure everything's working, show you how to use it, clear away the packaging, sweep up and – once we've seen the smiles and you're happy – only then do we leave.

11 THE ZIOXI TOUCH

"Learning should be playful. Learning environments should be bright, engaging, seductive and of course effective. They should lift spirits, inspire, surprise and challenge. People want to learn and discover; learning environments should help them to do so ambitiously and together. I'm a great fan of **zioxi** furniture because it can do all this. It is agile, practical and designed around learning. Right now, they are leading a revolution in learning space design."

Case Studies

The proof of the pudding. The evidence.
This is what it looks like in the real world.
Real life case studies from seven of our
recent projects.

Scientia Academy

*"zioxi were a delight to work with,
I'll be using them again for my next
project"*

Yateen Bhoola, Head Teacher.

"zioxi were a delight to work with, I'll be using them again for my next project"

Yateen Bhoola, Head Teacher.

This spacious and unique school building was designed to incorporate curves instead of straight lines. The brief was to create furniture that could be used in original and innovative ways by teachers, yet also be used in the traditional manner to meet classroom requirements. Furniture that complemented the curved walls and open spaces and was welcoming as well as intriguing to children.

IT Suite: The Head Teacher at Scientia Academy had an incredible vision to create a IT space that utilises the central hub of the school. **zioxi** worked with Yateen to create a bespoke curved area with fixed IT benching and adjustable touch screen monitors. To add the finishing touch, large screens were installed at each end that rise up at the touch of a button – just magic!

Simon De Senlis Primary

"The furniture felt like a fresh start for the school and is very different to what we had before. I love it because you can change the layout of the classroom quickly and easily when you need to"

Wendy Souter, Year 2 Teacher.

"The install team were first class, professional, efficient and accommodating. They arrived early, they were quick and before you know it the classrooms were done and ready to use."

Tom Rees, Head Teacher.

When Head Teacher Tom Rees started his new role at Simon De Senlis Primary, he had big ideas about how he wanted to develop the school to its full potential.

A key part of this development was to create inspiring learning spaces for both the children and the teachers. The old furniture in the

school was uninspiring, tired and mismatched, leading to a lack of pride from the teachers and children. The classrooms were messy, cluttered and unloved.

Tom started a project to turn the school around called "Simon de Senlis Reimagined" using a collaborative process to create a vision for the school. A really important part of this was the learning environment. The group decided they wanted a look that was clean, contemporary, de-cluttered and flexible in order to complement their strategy to create "curious, industrious, agile learners that go on to make a dent in the universe."

Jesmond Gardens Primary School

"zioxi furniture met our need for agility and flexibility and enabled us to make our vision a reality."

Jane Loomes, Head Teacher.

"We needed flexible layouts that we could change easily, places that were capable of accommodating lots of different learning and teaching styles. zioxi furniture met our need for agility and flexibility and enabled us to make our vision a reality."

Jane Loomes, Head Teacher.

If you visit Jesmond Gardens and find what looks like the corpse of one of Henry VIII's wives on the floor, don't worry, it's just one of the ways the teachers there make learning truly exciting and inspiring for their students. The school has nine class bases, each with

mobile, agile furniture so the layout can be changed easily. The furniture in each class base is the same but they all look and feel completely different because the teachers have been able to create the learning space that best suits their year group. With quiet areas, snugs, a wet bay and library the school is designed to deliver truly personalised, independent learning that also takes advantage of the best that ICT has to offer.

The heart of the school has vibrant soft furnishings where students can work in groups or meet up socially, creating another flexible space that can accommodate a range of uses.

Reading College

"Thanks zioxi your patience and enthusiasm to go the extra mile, focus on the detail and deliver all of this in a tight timescale is magnificent."

Paul Newman, Acting Principal.

"Thanks zioxi, your patience and enthusiasm to go the extra mile, focus on the detail and deliver all of this in a tight timescale is magnificent."

Paul Newman, Acting Principal.

zioxi were thrilled to work with Reading College to refresh their wonderful Library space. The brief was to create a space that was bright and welcoming with lots of places for the students to work. To fit in the number of students required **zioxi** made the best use of the space with bespoke benching

around the pillars and along the edges for individual working. In the collaborative working area interlocking Lunar tables make the area really flexible, allowing different table configurations and layouts.

Breakout areas with soft seating were added for those that wanted to learn in a more relaxing environment and the librarians had a new bespoke reception counter that they just love! In the words of Reading College, "We really did get our moon on a stick."

Earl Spencer Primary School

"It was a pleasure working with the team at zioxi on the design of our new classrooms"

Mark Rapps, Head Teacher.

"It was a pleasure working with the team at zioxi on the design and layout for our new classrooms. Children and teachers at Earl Spencer are delighted with their new rooms"

Mark Rapps, Head Teacher.

The school wanted a modern look for their new classrooms with furniture that allowed the spaces to be easily reconfigured for different lessons.

zioxi designed eight of the new build classrooms, for years 3-6. Included in our designs were **zioxi** TeacherWalls® - with individual tray storage for each student and t41

tables allowing the school total flexibility for arranging the classrooms depending on the lessons taking place.

The classrooms are finished with a Reading Nook. The Reading Nooks are neatly tucked away in the corners of the rooms and provide a perfect place for one-to-one or group reading or as a comfortable area for listening to audio books.

The school selected a range of vibrant colours to match the school brand. The finished classrooms look amazing and compliment the new building perfectly.

Barnard Grove Primary School

"All of the guys were really helpful and friendly. Our school corridors were cleaner after they'd finished than we had ever seen before."

Lee Walker, Head Teacher.

zixoi worked alongside Barnard Grove Primary School, Hartlepool, to develop a bright, engaging learning environment for their new £2.8m build providing places for 315 pupils and a 26-place nursery.

From the outset, the schools' vision was to create classroom spaces that were flexible, maximise storage space wherever possible and to create an LRC space which would become the 'heart' of the school.

In corridor spaces our CubeWall system provides the students with coat and bag storage with upholstered benching as a place for them to change their shoes.

In the LRC, the school was keen to create little 'nook' spaces. The curves of the BookWorm® work perfectly to provide quieter zones where students can work or read. The flexible furniture solution was continued in the breakout areas with s41 seating arranged in circles and waves.

In the classroom spaces, t41 tables alongside **zixoi** T Chairs allows Barnard Grove the ability to create agile, adaptable classrooms, breakout spaces and learning environments.

Images supplied by Kevin Stainsby Photography.

Denbigh Primary School

"We wanted the LRC to have the **Wow Factor** with lots of different areas for the children to work."

Denbigh Primary School, Luton.

Denbigh Primary wanted the LRC to have the "Wow Factor" with lots of different areas for the children to work.

Denbigh Primary School.

zioxi were delighted to work with Denbigh Primary School in Luton to furnish their Learning Resource Centre and Infant Library.

The brief from the school was to create learning areas that were fun and exciting, which the children would want to use. The school wanted the LRC to have the 'Wow Factor'.

Renamed as "The Hive" the LRC/ICT Suite needed to be divided into two areas, a large space for 30 computers and a large area for reading and project work.

zioxi designed the space to include a large curvy BookWorm® which divided the space into two. With a walk through bridge both learning zones are now easily integrated.

Meanwhile the Infant Library 'The Burrow' was designed with flexible solutions to allow the space to be reconfigured or cleared for a range of activities.

A close-up, low-angle shot of artificial grass. The blades are a vibrant green color and are densely packed. The focus is sharp on the blades in the foreground, while the background is softly blurred, creating a sense of depth. The lighting is even, highlighting the texture of the synthetic fibers.

How to order

All the information you need – contact details, information about delivery and installation.

Placing your order

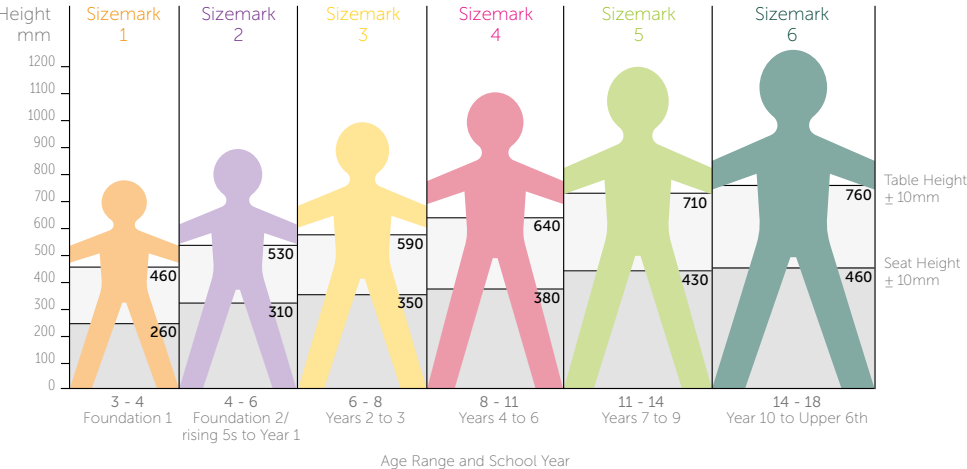

tel: 01844 280123

Between 9am and 5.30pm Monday to Friday for all enquiries or to place an order
fax: 01844 281373 email: info@zioxi.co.uk

Customer Service

zioxi is renowned for superb customer service. We don't simply deliver and run. We make sure it fits and that you know how it works. If you have any questions we will do our very best to help. To ensure we get it right first time please give us as much information as possible, including:

- Specification – have you specified colour and size?
- IT specification – if you are ordering products into which you are integrating IT, such as those in the Integrated IT section, you need to tell us the specification of the equipment that's going into it, including CPU/monitor size.
- Contact details – name and number of the person who will be taking delivery.
- Out of school hours – if you are taking delivery or booking an installation out of school hours, eg during school holidays, we need contact details (name and mobile phone number) of the people who will give us access to the site.

zioxi Limited, 57 High Street, Tetsworth, Oxfordshire OX9 7BS, UK.
www.zioxi.co.uk

Catalogue guide

- Product requires on-site installation
- Product will stack to quantity indicated above
- All measurements indicated = cm Width (W) x Depth (D) x Height (H)

Delivery

Lead times – most products are available six weeks from order. Actual delivery date will be confirmed once order has been processed.

Delivery charges are quoted on a case by case basis.

It is assumed that products are delivered to the ground floor with reasonable vehicular access and we reserve the right to add supplementary charges if access is difficult.

If delivery is to anywhere other than the ground floor please advise if there is lift access and the dimensions of the lift. It is essential that we know these details to ensure we send the appropriate team and equipment to ensure a smooth delivery.

Installation

zioxi IT desks, cupboards, cabinets, lockers and trolleys are designed to accommodate most proprietary hardware. When ordering, please advise the specification of the kit you intend to install so we can confirm that it will fit.

IT hardware and accessories are not included in the price.

Standard delivery does not include the installation of hardware, cabling or accessories in any of the **zioxi** IT desking products. If you require installation there will be an additional fee. Please ask for details.

Terms and Conditions

Please see www.zioxi.co.uk for full terms and conditions.

Continuous Improvement

Due to variation in materials, developments and improvements in design, we may alter the specification and appearance of our products from time to time without notice.

The zioxi Ten Year Guarantee

Our furniture is designed to withstand educational environments. We use materials, components and manufacturing methods that make our products a cut above in terms of quality.

That's why we offer a ten year guarantee as standard.

10 years

A decade. That's our standard guarantee on all products with no moving or electrical parts.

5 years

Five years is our guarantee on products with moving parts like hinges, castors, cranks and other mechanisms and all soft seating products.

2 years

All electrical components within our products and our acoustic pods are guaranteed for two years.

Standard Guarantees

What happens if there is a problem?

If any defect, malfunction or failure occurs which is not the result of abuse, accidental damage, inappropriate use or mishandling, we will repair or replace the part or product free of charge. This guarantee is subject to terms and conditions which you can find on our website at www.zioxi.co.uk.

All product guarantees are detailed on the individual product specification sheets so please check these if in doubt. These can be found on our website www.zioxi.co.uk or give us a call and we will happily discuss.
